Pavithra Maduranga Bamunu

COMMERCIAL & BUSINESS ANALYST — CATEGORY · FORECASTING · RETAIL ANALYTICS

9 Charlotte Street, Eden Terrace, Auckland 1021 · 022 619 7626 · pavithrasam.s6@gmail.com

linkedin.com/in/pavithra-maduranga-19624675 · pavi44m.github.io/pavibamunu

NZ Post-Study Open Work Visa (valid to 14 March 2029) · NZ Driver Licence · English (C1) · Sinhalese (Native)

PROFESSIONAL PROFILE

Commercial and business analyst with fifteen years across multi-site retail in New Zealand and Asia — spanning category P&L ownership, demand forecasting, and the direct leadership of teams of up to 120 people. I have sat on both sides of the analytics divide: building the forecasts and being the person accountable when they are wrong.

At Samsung Electronics, I grew a television category from $8.9M to a $16.8M annual peak while the 32-inch segment it depended on was actively contracting, hitting 120% of target three years running. Earlier, as Team Leader of Samsung's retail field force, I led 120 product consultants across four territories and was named Best Team Leader in two consecutive years.

I then relocated to New Zealand and deliberately rebuilt from the ground up: a Master of Applied Business in Business Analytics at Unitec, finishing with a GPA of 7.0 and the only First Class Honours awarded across three graduating intakes, alongside frontline retail roles that keep me close to the operational reality most analysts only model. Today I hold the New Zealand Manager's Certificate and operate SAP daily at a Foodstuffs North Island store, translating store-level data into ordering, staffing and merchandising decisions.

CAREER HIGHLIGHTS

- **$8.9M → $16.8M** television category growth at Samsung Electronics (2019 to the 2022 peak) against a contracting core segment — 120% of target in 2021, 2022 and 2023
- **Shelly, an analytics agent** I built and published open-source — a CRISP-DM pipeline plus a report engine that writes Excel workbooks with live formulas and PivotTables from a plain-English request; 150 automated tests with continuous integration
- **120 product consultants** led across four Sri Lankan territories, with end-to-end responsibility for team performance, training and administration
- **163% sell-out growth** in Southwest Asia (2020 vs 2021) driven by market segmentation and competitor benchmarking roadmap recommendations
- **Only First Class Honours** awarded across Unitec's February, July and October 2024 intakes graduating in 2025 — GPA 7.0, 180 credits at NZQF Level 9
- **500+ franchise professionals** reached through the digital transformation of Samsung's national retail training programme
- **1,000+ SKUs** covered by a Python-based inventory tracking and warranty system I built at Orel Corporation, with just-in-time replenishment logic
- **Best Team Leader, 2013 and 2014** — 110% and 125% of target respectively; awarded the Thailand incentive tour in both years
- **Three master's degrees** — Business Analytics (NZ), International MBA (UK), and Project Management (Malaysia)

KEY SKILLS

Analytics & Reporting Advanced Excel (PivotTables, Power Query, lookups, scenario modelling) · Tableau · Power BI (DAX, data modelling, dashboards) · SQL · Python (pandas, scikit-learn, statsmodels) · R

Forecasting & Planning Demand forecasting (SARIMA-X, XGBoost) · Customer segmentation (K-means) · Capacity and workload planning · Variance and trend analysis · Range and assortment planning

Commercial & Financial Category P&L ownership · Budget target setting · Month-end reporting · KPI design · Pricing and range analysis · Commercial negotiation · Government and corporate tendering

Business Analysis Requirements gathering · Process mapping · Data integration and vendor mapping · Data quality and integrity · Stakeholder engagement

Systems & Compliance SAP store operations · GS1 compliance and product recall · Inventory and stock control · Health and safety governance · Liquor licensing compliance

Leadership & Operations Team leadership from 5 to 120 · Master Trainer accreditation · Training design and delivery · Cross-functional programme leadership · Team administration

Tooling & Delivery Python command-line tooling and packaging · SQLite star-schema design · DuckDB · Automated testing (pytest) · Continuous integration (GitHub Actions) · Git and GitHub · Excel automation with live formulas and PivotTables (openpyxl) · Reproducible CRISP-DM pipelines

PROFESSIONAL EXPERIENCE

Licenced Duty Manager
Jun 2026 – Present

Four Square Eden Terrace · Auckland

Promoted from Trainee Duty Manager (Jan 2026) to Licenced Duty Manager (Jun 2026). Shift accountability for a Four Square grocery banner, spanning SAP store operations, stock-accuracy checks, shift supervision and licensed-premises compliance.

- Supervise five to ten people on shift — task allocation, break coverage, and closing the store without exceptions
- Run daily and ad-hoc cycle stock counts and investigate negative-SKU exceptions in SAP, mapping collected SKU data to shelf location by scan — the checks that surface stock-accuracy errors before they reach replenishment
- Operate SAP store systems every shift — inward goods receipting against purchase orders, SKU ranging and listing, stock actuals updates, price and promotion verification, electronic shelf labels, and product recall handling checked against GTIN and production date
- Monitor Four Square Now online order flow and food-safety dashboard levels (Safety Food Pro) through the shift
- Hold the New Zealand Manager's Certificate; accountable for licensed-premises and food safety compliance on shift

Operations Maintenance Support
Dec 2024 – Aug 2025

Mānawa Bay Premium Outlet Centre (PPCS) · Part-time · Auckland

- Managed daily inventory checks and stock rotation across 50+ product lines in a high-volume retail precinct
- Maintained cleaning, sanitation and health and safety standards to the centre's audit requirements

Supply Chain Data Analyst (Internship)
Feb – Jul 2025

USL Medical · Auckland

- Performed data integration and vendor mapping across procurement and warehouse systems using SQL and advanced Excel, improving cross-functional visibility for operational decision-making
- Delivered GS1 compliance assurance across 1,000+ product SKUs, validating data accuracy and identifying systemic quality risk

Senior Manager — Business Development & Growth
Nov 2023 – Jul 2024

Ceylon Business Appliances (Pvt) Ltd · Sri Lanka

- Managed full department P&L, budget target setting and KPI reporting, translating financial results into planning recommendations for the executive team
- Led category strategy across B2C and B2B channels, including government and corporate tender engagements

Manager, Product Management — AV / Visual Display
Mar 2019 – Oct 2023

Samsung Electronics · Sri Lanka

Country-level category ownership for Samsung's television and audio-visual portfolio, spanning range strategy, demand planning, pricing and channel execution.

KEY ACHIEVEMENTS

- Grew the television category from $8.9M annual turnover on appointment (2019) to a peak of $16.8M in 2022 — $15.7M in 2021 and $16.5M in 2023 — achieved against a contracting 32-inch segment, delivering 120% of target for three consecutive years
- Led the “Upsize” screen-size promotional series, shifting the Sri Lankan market toward larger-format televisions and driving a generational change in category mix
- Built Power BI dashboards and SQL-driven reporting used by senior leadership and retail partners to monitor month-end results, category performance and forward demand
- Ran market segmentation and competitor benchmarking; the resulting roadmap recommendations drove 163% sell-out growth in Southwest Asia (2020 vs 2021)
- Led the digital transformation of national retail training for 500+ franchise professionals, directing a core cross-functional team of five to ten

Business Development Manager — IT & Digital Experience
Jun 2015 – Nov 2018

Orel Corporation (Pvt) Ltd · Sri Lanka

- Grew the mobile business by over 20% year on year across the full tenure, reaching $0.5M annual turnover in 2018
- Developed a Python-based inventory tracking and warranty management system covering 1,000+ SKUs with just-in-time replenishment logic

- Managed IT and digital product categories across retail and online channels, owning category P&L and a team of 25 across sales, technical and support functions

Team Leader — Retail Field Force

Aug 2011 – Jun 2015

Samsung Electronics · Sri Lanka

Leadership of Samsung's retail field force across four Sri Lankan territories, covering team performance, product training and field execution.

- Led up to 120 Samsung Product Consultants across the Colombo suburbs and the North, Northwest and South territories
- Owned end-to-end team administration across four territories — attendance tracking, leave approval, terminations, resignations and replacement planning
- Delivered soft-skills and product training as Master Trainer for IM (mobile) products, including to branch and territory managers
- Achieved 110% of sales target in 2013 and 125% in 2014; named Best Team Leader in both years and awarded the Thailand incentive tour twice

SELECTED PROJECTS & PRODUCT LAUNCHES

Shelly — Analytics Agent v2.6.1 (open source)

2026

Self-built analytics system · Python, SQL, R · Excel, Power BI, Tableau, SQLite outputs · pavi44m.github.io/Agent-Shelly-0.3

- Built an end-to-end CRISP-DM pipeline that turns a week of point-of-sale, stock and waste data into a diagnosis and a prioritised action list — demand forecasting, customer segmentation, exception detection and reorder logic in a single run
- Benchmarked five forecasting approaches head to head and selected SARIMA-X on out-of-sample accuracy at 16.4% WAPE, with K-means segmentation alongside it — model choice and error reported rather than assumed, and planning ranges derived from real backtest error
- Added a report engine that answers a plain-English request — “a budget for the next three months”, “a 13-week forecast for Dairy” — with the workbook an analyst would have built: Dashboard, live SUMIFS and INDEX-MATCH formulas, a real PivotTable, and an Assumptions sheet that drives the rest. Zero formula errors on every build
- Extended to sixty-six skills across fourteen packs, a module modelling a medical importer’s supply chain (stock-out and expiry risk, supplier scorecard) and a commercial lab that scores 317 in-store promotions against what each line would have sold anyway. Published with 150 automated tests and continuous integration; synthetic data only, and no employer data of any kind is used

Catchment Mission Fit — Retail Network & Shopper Mission Analysis

2026

Self-initiated study · Auckland grocery network · pavi44m.github.io/pavibamunu

- Segmented 606 Auckland catchments covering 516,585 households by the shopper mission their household composition implies, then overlaid the result on the public store network to identify format-to-mission mismatch — 22 catchments flagged, 18,771 households
- Built end-to-end in Python (pandas, scikit-learn, pyproj) with K-means clustering and PCA; validated independently in R by gap statistic, 100-resample bootstrap stability (mean Jaccard 0.862) and MANOVA
- Modelled the commercial case against Foodstuffs North Island's published FY24 accounts, finding the recapture opportunity second-order at a 3.17% EBIT margin and capital allocation the first-order lever — roughly 27× the leverage
- Delivered as a live interactive dashboard, a 15-slide proposal deck and a full CRISP-DM write-up; built entirely on public data (Stats NZ Census 2023, HES, OpenStreetMap) with a deliberate boundary excluding all employer data

Machine Learning Demand Forecasting & Customer Segmentation

2025

Industry Research Project (Grade A–) · Master of Applied Business, Unitec · Auckland, New Zealand

- Built machine-learning demand forecasting and customer segmentation models using SARIMA-X, XGBoost and K-means clustering on Statistics NZ datasets, visualised in Tableau for stakeholder-facing delivery
- Handled the full pipeline end-to-end — data acquisition, cleansing, integrity validation and feature engineering on real-world data rather than a prepared dataset
- Translated statistical outputs into strategic recommendations for a non-technical audience, the core skill the project was assessed on

Neo QLED 8K 85" — Flagship Television Launch

Jun – Oct 2021

Samsung Electronics · Sri Lanka

- Led the Sri Lankan market launch of Samsung's flagship 8K halo television, running the full campaign arc from teaser through to post-launch

- Built the pre-order programme (28 June – 11 July 2021) around targeted social, CDM and Google advertising, bank partnership tie-ups and online PR
- Directed main launch communications including national print advertising with 100k+ circulation, then sustained momentum post-launch through partner CEO testimonials, CDM retargeting, televised talk-show segments and a 3D/AR pre-purchase experience

Funbelievable T Series — Mass-Market Television Range Launch Oct 2020 – Apr 2021

Samsung Electronics · Sri Lanka

- Launched the T Series range positioned around the convergence of work and entertainment — PC Mode, integrated music system, Live Cast and a three-year warranty
- Localised global campaign content for the Sri Lankan market and delivered coverage across ATL, BTL and social channels

OrelPay — Mobile Payment Platform Jul – Nov 2018

Orel Corporation (Pvt) Ltd · Orange Electricals · Sri Lanka

- Delivered a payment gateway platform for iOS and Android enabling secure transactions through linked bank accounts, credit and debit cards
- Rolled out dynamic and static QR code payment acceptance across a network of 150+ OrelPay merchants

IoT Smart Wi-Fi Socket — Product Development with Dialog Feb – Aug 2018

Orel Corporation (Pvt) Ltd · Sri Lanka

- Brought an IoT-enabled Wi-Fi smart socket to market for the consumer electronics category, extending the range into connected devices
- Partnered with Dialog's engineering team on software development, delivering socket control through an IoT platform on both iOS and Android

EDUCATION

Master of Applied Business — Business Analytics 2024 – Nov 2025

Unitec Institute of Technology · Auckland, New Zealand

- **Result: GPA 7.0 — awarded First Class Honours.** The only First Class Honours awarded across Unitec's February, July and October 2024 intakes graduating in 2025. 180 credits at NZQF Level 9

International Master of Business Administration 2022 – May 2023

Buckinghamshire New University (UK) — IDM Nations Campus · Sri Lanka

- Dissertation (60 credits, Level 7) in strategic international business research

Executive Master of Science — Project Management 2017 – Oct 2018

Asia e University · Kuala Lumpur, Malaysia

- **Result: CGPA 3.40.** Subjects included Project Governance & Strategy, Business Research Methods, and Leading & Managing Project Teams

PROFESSIONAL QUALIFICATIONS & CERTIFICATIONS

- **Microsoft Power BI Data Analyst Professional Certificate** — Microsoft Enterprise, November 2025 (valid to Nov. 2027)
- **Microsoft PL-300: Power BI Data Analyst** — in preparation; examination scheduled for January 2027
- **New Zealand Manager's Certificate** — Auckland Council, issued June 2026. Licence Controller Qualification (LCQ), March 2026
- **Essential First Aid** — New Zealand Red Cross, August 2026
- **Agile Project Management & Scrum Methodologies** — Project Management Institute, July 2023
- **Product Management Professional Certification** — Samsung Electronics, September 2022
- **Explore Emerging Tech Badge** — IBM, August 2025 (Credly verified)

AWARDS & RECOGNITION

- **First Class Honours, Unitec** — the only such award across three graduating intakes (2024 Full cohorts graduating 2025)
- **Best Team Leader, Samsung Electronics** — awarded in both 2013 and 2014
- **Thailand Incentive Tour, Samsung Electronics** — awarded twice for sales performance
- **120% of target, three consecutive years** — television category, Samsung Electronics (2021–2023)
- **Master Trainer accreditation** — Samsung IM (mobile) products, delivering to branch and territory management
